

SPOILERS HAVE BEEN REDACTED!

The Unadoptables is a great book and I really enjoyed it. I ended up reading the book in less than two weeks as I was so captivated by what was written and struggled to put it down. It is the first book I have read by Hana Tooke and now I know she is a great writer and cannot wait to read other books from her.

I would say my favourite part of the book was when [REDACTED]
[REDACTED] I liked it because from the very start of the book I followed
[REDACTED] journey of [REDACTED]
[REDACTED] When [REDACTED] I was so glad for her. It was
one of the best books I have ever read.

The only thing I would change is the writing in Milou's book of theories as it is hard to read with that font choice. I believe the author did well by creating the names for the characters. I especially like how she chose Lotta for the 12 fingered girl. She's my favourite character because she likes science and I like science too so I felt that I could connect to her. Lotta doesn't give up which I think is a great characteristic to have!

I loved the book, I loved how the story is sad, but exciting with their journey and in the end it is wonderful [REDACTED]. I loved where the story was set and I learnt a lot of new vocabulary from this book.

I would recommend 'The Unadoptables' to people who like fairy tales. The age group I would recommend is probably 9-15 but that's just my thoughts as I think anyone would enjoy it, I will definitely recommend it to all of my friends.
